

## VTEL's All-In-One "3-wire" communications system

The VTEL IPanel 2600 seamlessly blends advanced **videoconferencing**, advanced **computing**, and advanced **cable TV**.

The VTEL IPanel 2600 is a high performance **videoconferencing system**.

- Latest industry standards – includes H.264 video, H.239 data sharing, and H.235 encryption. Using the public Internet you can conference with colleagues, customers, and business partners...anywhere in the world.
- High quality pan/tilt/zoom camera – the same one used in high-end videoconferencing systems. The VTEL IPanel 2600 provides the highest available picture quality.
- The VTEL IPanel 2600 is designed to conference at 384Kbps or lower with optimum performance over the public Internet via cable modems or DSL service.

The VTEL IPanel 2600 is a high performance **Intel Pentium M computer with Microsoft XP Professional**.

- The built-in computer has a 1.8GHz processor, 512 Mbytes of RAM, 40Gbyte drive, and a DVD player. Add Microsoft Office and you can present your PowerPoint slides in a local meeting or in a videoconference.
- There are 4 USB data ports for custom peripherals and expansion.

The VTEL IPanel 2600 is a professional grade 26" LCD monitor and HDTV ready television. Just plug in a cable connection to receive television programs.

- High resolution (1366 x 768 pixels) and Multi-scanning PC monitor support up to 1280 x 1024 for ultra sharp data displays and television program viewing.
- View a television channel (like CNN) by itself, or while surfing the Internet, or while in a videoconference.

## VTEL IPanel 2600

### All-In-One Professional Solution

All functions are displayed on the professional grade 26" LCD HDTV ready monitor. All operations are under the control of VTEL's wireless keyboard/mouse.

"All-In-One" means a clean uncluttered conference room and a single user wireless interface to control everything.

Your conference room always presents a professional, efficient, and modern environment with the VTEL IPanel 2600. It is perfect for branch offices, professional services offices, and home offices where space and operating costs are limited.

There is no need for IT support people to set up the equipment. It installs like any other PC, only quicker. All components arrive assembled. The only installation is to plug in the three cables. We will provide you one hour of telephone installation support FREE to make sure everything is working. You will also successfully make your first videoconference call with us over the public Internet.

### Simple Pricing

The price is also simple. The VTEL IPanel 2600 is \$4,995 complete with a one-year warranty covering the entire system.

To achieve similar functionality as the All-In-One VTEL IPanel 2600, you would need to buy a separate videoconference system, a PC, plus a 26" LCD monitor. Today you would pay \$9,500 or more, and then you would have to assemble the components. And, you would have three warranties to manage.
