# 9 Ways to Simplify Your WAN

Simplify your global wide-area network while lowering your total costs of ownership. MASERGY's advanced intelligent network gives you flexible services built into the WAN, and delivered anywhere in the world you do business. We also provide award-winning web-based tools that let you view your WAN's performance and make immediate changes to your service at anytime, day or night. Best of all, we future-proof the network by embedding new services directly into the WAN.

- 1 Embedded Network Management**—view granular network information with the click of a button using industry-leading network management software that embeds the software, hardware, integration and management into the service.
- 2 Real-Time Control**—change your WAN services in-house at any time for immediate results, using MASERGY's award-winning, Web-based Service Control Center.
- 3 Secure Global Convergence**—combine your voice, video, Web and data services on a single, seamless global network with 5 classes of service, without compromising quality, security or functionality.
- 4 Seamless Global Offering**—receive the same award-winning services from a single company, delivered via an Ethernet hand off, anywhere on the planet you do business.
- 5 Simple Global Billing**—get a single, easy-to-understand bill detailing all of your global services.
- 6 Future-Proof Services**—avoid network obsolescence by adding service upgrades and new capabilities immediately - they are already integrated into your intelligent network.

- 7 Readily-Scalable Solutions**—add new business locations at any time without expensive and time-consuming “network integration” projects.
- 8 Performance-Based Savings**—reduce your total cost of ownership by optimizing network capacity and removing unnecessary circuits, without sacrificing business performance.
- 9 Integrated Service Partners**—connect with dozens of industry-leading equipment and service providers who are already on the MASERGY network, giving you easy access to their services.
